

The Idea: To create a website that made a guide for fashion and art based on music taste.

Music: The music section and each style guide page are differentiated by genre and its associated playlist. By using the tool people could gain exposure to music comparable to what they like and find music in different genres and time periods. The music selected for the playlist is a combination of diverse artist within the genre. When the user enters the page, the playlist should play in the background as they explore the different musician biographies, artists, and fashion styles.

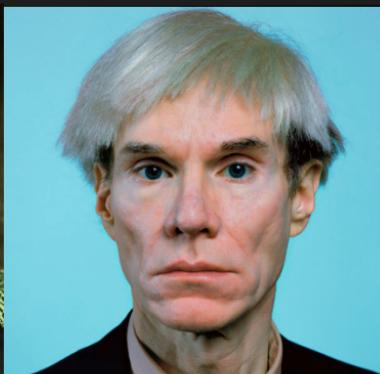

Art: Although some artists are well known and displayed, many are not recognized. The art section is a tool that will introduce people to the art world by relating their musical interest to the artists' styles. The art section has a slideshow of art pieces and pictures of the artist that created the work. A link to each artists' website and their biography can be found on the page.

Fashion: The fashion page gives users a chance to explore different styles they might like based on their music taste. To offer users more opportunity to shop from more diverse businesses, all the stores linked are either:

- made from sustainable or recycled fabrics
- BIPOC owned
- made from companies that follow fair trade regulations
- a thrift/vintage store

A powerpoint of profiles can be provided upon request.
